BhuRakshak - Case Evidence Report

Case ID: 1
Petition ID: PET-2025-00001
Centroid (lon,lat): [73.85198, 18.54834]
Imagery (before -> after): 2024-01-15 -> 2025-01-20; SIMULATED (Sentinel-2-like); Synthetic
Change type: Possible vegetation loss
Area (ha): 2.8
Confidence %: 86.0
Risk: High (62.0)
dNDVI / dNDWI: -0.47 / 0.23
dNDBI / dBSI: 0.36 / 0.42
GIS context: Nearest water body 88 m, road 509 m, forest 830 m. Not near a protected area in the available dataset.
Citizen complaint: Trees appear removed near the lake edge (SIMULATED).
Officer decision: Needs More Evidence
Remarks: revisit
Final status: Needs More Evidence
Why flagged: Critical priority because possible vegetation loss was detected near a water body. No matching public permit record was found in the available dataset. Field verification is required.

This report is an AI-assisted preliminary indication of possible land-use change. It is not a legal determination of illegality. Official verification, land records, permits, and field inspection are required.
