BhuRakshak - Case Evidence Report

Case ID: 2
Petition ID: PET-2025-00002
Centroid (lon,lat): [73.85288, 18.54104]
Imagery (before -> after): 2024-01-15 -> 2025-01-20; SIMULATED (Sentinel-2-like); Synthetic
Change type: Possible bare soil / excavation
Area (ha): 3.18
Confidence %: 91.0
Risk: Critical (84.0)
dNDVI / dNDWI: -0.14 / 0.05
dNDBI / dBSI: 0.46 / 0.41
GIS context: Nearest water body 827 m, road 630 m, forest 140 m. Within 500 m of a protected area.
Citizen complaint: Digging near forest boundary (SIMULATED).
Officer decision: Potential Violation
Remarks: Field team confirmed fresh excavation; no permit found (SIMULATED).
Final status: Potential Violation
Why flagged: Critical priority because possible bare soil / excavation was detected near a sensitive area. No matching public permit record was found in the available dataset. Field verification is required.

This report is an AI-assisted preliminary indication of possible land-use change. It is not a legal determination of illegality. Official verification, land records, permits, and field inspection are required.
